

International  
Rett Syndrome  
Foundation

Accelerating Research. Empowering Families.

# CREATE A WORLD *Without* RETT

The International Rett Syndrome Foundation (IRSF) is the leading research and family empowerment organization for Rett syndrome. We're on a mission to transform the lives of all those affected by Rett syndrome by accelerating research toward treatment and a cure while empowering families with the information, programs, and services they need to thrive.

## *Accelerating Research*

We work with cutting-edge researchers and pharmaceutical companies to set up the next wave of Rett breakthroughs in pursuit of a cure. We invest in innovative research, work to build a robust treatment pipeline, and remove barriers to ensure clinical trial success. We are committed to a full-spectrum approach, providing solutions for everyone living with Rett syndrome.

## *Empowering Families*

We provide families with the latest medical information, offer meaningful support, raise public awareness, and advocate for all those living with Rett syndrome. From hosting our RettEd educational series of webinars and connection events, to publishing research-based resources on the most important topics, we help families thrive.

Over nearly 40 years, IRSF has invested more than \$58 million to fund breakthrough discoveries and life-changing advancements in research while supporting thousands of individuals and families around the world at all stages in their Rett journey.

IRSF is a 501(c)(3) tax-exempt organization (EIN: 31-1682518).  
**More than 85% of every donor dollar is devoted to our mission.**
